Working practices and legislation

4.1 (pt 2) Demonstrate good health and safety practice when working on film productions

How will/did you apply good health and safety practice when making your film?	Make sure you cover all the possible opportunities of ~~&~~ someone getting injured or hurt. you can do this when completing the risk assessment form in pre-production. make all the rooms which seem dagerous when filming or on set.
Add your risk assessment and explain why this is important.	a risk assessment is important because it is a way for everyone working on set to know if ~~ther~~ what all the possibilies of someone ~~get~~ going through the some situation which might cause an accident. make sure everyone knows how to deal with a problem or accident which happen.
